## DETOX IN GUARD: POWERFUL SUPPORT FOR NERVE AND IMMUNE CLEANSING

### WHY YOU NEED DETOX IN GUARD

In today's world, **PERQUE'S** dynamic **Detox IN Guard** is more vital than ever. Toxins can accumulate and damage critical internal body systems, unless you have an active anti-toxin program.

Over the past 50 years, more than 100,000 chemicals have been introduced into the environment. When you are exposed to these chemicals, your body must detoxify them. Toxins include 1) pollutants in the air, water, and soil; 2) toxic metals such as lead, cadmium, and mercury; 3) pesticides, herbicides, insecticides, fungicides, and fumigants. Further, food additives and preservatives can adversely affect nerve and immune function in many people. Any distress is a further "tax" on the system that **Detox IN Guard** can help relieve.

Nerve and immune tissues become impaired as a result of this "toxic overload." **Excess toxins** sabotage delicate cell machinery, leading to **less endurance and energy, impaired immune function, and less resilience in dealing with everyday stresses and challenges.**

### THE DETOX IN GUARD INNER CLEANSER

#### PERQUE Detox IN Guard

is a unique, exclusive formula that meticulously detoxifies the tissues involved in the immune and nervous systems. This combination of amino acids, lipotropic factors, and minerals effectively clears out the toxins that accumulate in the nerve and immune system tissues and cells.

**Plus: Detox IN Guard** neutralizes excess cellular acid, thereby protecting cells against corrosion.

**Detox IN Guard** effectively promotes resistance in four ways:

- 1) **Methionine, glycine, cysteine, and glutathione are potent nutritional detoxifiers** that also **reduce homocysteine levels** and **boost neuroimmune and cardiovascular health.**
- 2) **Choline and inositol improve cell communication and increase cells' defenses** against viruses and other infectious agents.
- 3) **Ascorboryl palmitate** is a membrane-protective form of vitamin C.
- 4) Energizing and alkalizing co-factors help cells support optimal health.

## SYMPTOMS OF HEAVY METAL TOXICITY

Chronic exposure to heavy metals is a growing health problem in industrialized societies. These metals include lead, mercury, antimony, chromium, cadmium, and arsenic.

Heavy metal toxicity is characterized by fatigue, musculoskeletal complaints, mood swings, anemia, neurological problems, hypertension, kidney and liver

dysfunction, endocrine problems, and immune dysfunction.

Heavy metals are excreted through the urine, feces, and sweat glands. But when these detoxification routes aren't working right, you may experience toxic symptoms.
